

Harshita Kashyap

Full-Stack Engineer | AI Product Builder

India | +91-9507860094 | hrsa.kshyp@gmail.com | [LinkedIn](#) | [GitHub](#) | hrshita.online

Full-stack engineer with 3+ years of experience building production systems and AI-powered products. At TCS, developed and hardened Node.js services, authentication flows, integrations, and Angular modules for a healthcare platform serving 500+ enterprise clients. Previously delivered full-stack applications and data systems independently for multiple clients. Comfortable owning products from architecture through deployment. **Available to join immediately.**

SKILLS

Backend: Node.js, Express, Java, Python, FastAPI, REST APIs, session authentication, microservices

Frontend: JavaScript, TypeScript, React, Angular, HTML, CSS, Tailwind CSS

Data & Cloud: PostgreSQL, MongoDB, Supabase, Redis, Docker, AWS, Vercel, CI/CD

AI & Tools: OpenAI, Groq/Llama 3.3, Gemini, prompt engineering, Claude Code, Cursor, Codex, Git, Jest

EXPERIENCE

System Engineer

Oct 2024 - Jul 2026

Tata Consultancy Services

- Built and maintained Node.js APIs and cookie-based session authentication for a healthcare platform serving 500+ enterprise clients.
- Developed third-party integrations and reliable data flows between backend services and external systems.
- Expanded Jest coverage across backend modules, reducing regressions and improving release confidence.
- Owned the end-to-end migration of legacy frontend modules to Angular 21 while coordinating related API changes.
- Improved performance by 20% through API compression and NGINX routing fixes identified and delivered independently.

Freelance Full-Stack Engineer

Jan 2022 - Sep 2024

Independent Consulting - Multiple Clients

- Delivered full-stack web applications, internal tools, dashboards, and data systems end-to-end for international and small-business clients.
- Built real-time data platforms and REST integrations with React, Node.js, PostgreSQL, and MongoDB.
- Managed discovery, technical scoping, client communication, implementation, and delivery as the direct technical owner.

SELECTED PROJECTS

ApplyWise - Job Application Copilot

[Live product](#)

- Built a local-first Chrome MV3 extension that parses resumes, evaluates job fit, identifies missing qualifications, and fills repetitive ATS fields.
- Designed approval-based Answer Memory and pre-submit validation while preventing storage of sensitive fields and automated submission.

Vyntra - AI-Powered Health Intelligence Platform

[Live demo](#)

- Architected and shipped a full-stack health platform with React 19, Supabase authentication and real-time sync, and Groq-hosted Llama 3.3 70B insights.
- Built biometric dashboards for HRV, strain, and recovery trends with animated data visualization.

EDUCATION

B.Tech in Civil Engineering - BIT Sindri, Jharkhand

2020 - 2024 | CGPA: 8.6/10

CERTIFICATIONS & RECOGNITION

- Google Generative AI Leader • Google Cloud Platform Fundamentals
- Recognized by TCS for frontend modernization work
